

NORTHEAST LOUISIANA AMATEUR RADIO CLUB

January 7, 2020

@ Geneva Academy

Club President Scott Dickson, W5WZ, called the meeting to order at 6:30 PM. There were 12 members present.

The meeting opened with the construction of (9) 3-element 2 meter Yagi antennas made from steel tape measures, on PVC booms. Including one Scott had built earlier, there was a total of (10) antennas made. Some members took one home, but there were seven left that will be given to the West Monroe High School Amateur Radio Club. It was a great learning experience.

Scott passed out note cards asking everyone to put on (3) things you would like to see the club do in 2020, and (3) things that you personally would like to see happen in 2020. A good general discussion followed.

Meeting was adjourned at 8:30 PM.
